

## SOLUTIONS

### SOLUTIONS FOR BUSINESS

CFT design and implement complicated data warehouse solutions as well as supporting integration software and process optimization tools. We implement complex reporting tools and analytical systems enabling to optimize sales, maximise margins or improve customer satisfaction. Easy access to analytical data and reporting supports decision processes at all company's levels.

#### Our services include:

- Design, and implementation of input interfaces by use of ETL processes,
- Implementation of dedicated Data Warehouse and Business Intelligence tools (- including Microsoft Reporting Services, Tableau, Crystal Reports, ClickView etc.),
- Daily maintenance and support,
- Preparation of reports and analyses,
- Data Export/Import projects
- Capturing data in ingenious way
- Building search engines algorithms (Data Science)
- Problem solving analyses (SAS/R)

#### Our competences:

- Analysis, designing and development of input interfaces by way of ETL processes and SSIS & PL\SQL tools,
- Designing and further implementation of Data Mart's - data sources for Business Intelligence,
- Support of production applications
- Data Science / Big Data analytics

#### Benefits for Customers:

- Data from various sources is available in one database - to make the implemented warehouse the only source of reliable data for all Departments and decision levels,
- More effective reporting processes - less resources involved, fast access from one source,
- Improved quality of data and reports positively affects strategic decisions and effective management
- Up-to-date and adjusted architecture enable immediate access to data
